Database Management: MySQL, MongoDB

Tools & Platforms: Git, Github

PROJECT EXPERIENCE

MusicBoard – Mobile Application (Flutter)

2024

- Developed a cross-platform music review application using Flutter (Dart)
- Implemented user-friendly UI for browsing, rating, and reviewing music
- Focused on clean layout design and smooth navigation for mobile users

Movie Review App – Mobile Application (React Native)

2025 – NOW

- Built a cross-platform movie review app using React Native (TypeScript/JavaScript)
- Designed interactive screens for displaying movie details and user reviews
- Strengthened skills in component-based architecture and mobile UI development

Dodgelt – Game Development Project (Unity)

2025–NOW

- Created a 2D game using Unity with ShaderLab
- Worked on game mechanics, player movement, and visual effects
- Gained hands-on experience with game loops, rendering, and performance tuning

Alumni Management System – Full-Stack Web Application

2026–NOW

- Developed a platform to connect students and alumni
- Implemented authentication and profile management
- Enabled communication and event participation

JYC Website – Static Web Project

2025

- Collaborated on updating the official website for the 2025 tenure
- Contributed to HTML and CSS updates for content, layout, and styling
- Gained hands-on experience working within an existing codebase
